**Attachments:** Rose Chan inquiry May2017.pdf; 09-2255851.pdf

Thank you, Nina!

Kevin-- I provided some additional information to Rose Chan from Greenaction after the e-mail Lily forwarded you, see the attached. It includes a link to a FOIA and response we provided a couple of years ago with similar questions. We released all of our site assessment documentation as part of this FOIA and they can be downloaded from the FOIA website.

Attached is the most recent memo that was provided in this set of documents, and it indicates that the cleanup was making good progress under the State's oversight, and NPL listing was not pursued at that time.

**Subject:** RE: Question from Bayview Hunters Point IVAN Meeting

Hi Kevin,

As Lily Lee with the EPA indicated in her recent email, I am the project manager with DTSC assigned to the treasure island project. If you saw the chain of emails from Lily, you saw Nadia's (EPA proj. mgr) response to your question.

Although TI is not on the NPL, it is still treated like a Superfund site in that it is going through the same stringent cleanup requirements (Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) known as "Superfund"). The Navy is required to cleanup following CERCLA just as the Hunters Point site is. However, because Hunters Point is on the NPL list, the U.S. EPA is the lead regulatory agency overseeing the cleanup, along with DTSC and the Water Board. On TI, DTSC is the lead regulatory agency, along with the Water Board. The U.S. EPA has a minor role. The fact that it's not on the NPL list does not affect the cleanup standards.

I have received a call from a community member, as did Nadia, on your question. But it seems no matter how many times we answer it, we still get this question. Feel free to contact me if you have any other questions.
